

**Peter McDonald Architects of Cape Cod
Awarded Best Of Houzz 2021**

*Coveted annual award highlights home remodeling and design professionals with top ratings
and most popular designs among the Houzz community*

Eastham Cape Cod, January 28, 2021 – Peter McDonald Architects of Cape Cod has won a “Best Of Houzz” award for **Design** on [Houzz®](#), the leading platform for home renovation and design. The Residential Architecture Firm was chosen by the millions of homeowners that comprise the Houzz community from among more than 2.5 million active home building, remodeling and design industry professionals.

The Best Of Houzz badge is awarded annually, in three categories: Design, Customer Service and Photography. Design awards honor professionals whose work was the most popular among the Houzz community. Customer Service honors are based on several factors, including a pro's overall rating on Houzz and client reviews submitted in 2020. Architecture and interior design photographers whose images were most popular are recognized with the Photography award.

A “Best Of Houzz 2021” badge will appear on winners’ profiles as a sign of their commitment to excellence. These badges help homeowners identify popular and top-rated home professionals in every metro area on Houzz.

“The Best Of Houzz awards are an emblem of trust and credibility for home professionals across the U.S. and around the world, and we are excited to celebrate this year’s winners,” said Liza Hausman, vice president of Industry Marketing for Houzz. “The COVID-19 pandemic has highlighted the critical need for people to feel comfortable before inviting pros into and around their homes, and the Best Of Houzz badge is a powerful way for pros to communicate the trust that homeowners have in their business. It’s just one of many tools on the Houzz platform that help pros to communicate their unique expertise, and homeowners to find the right professionals for their projects.”

About Peter McDonald Architects

Our small, dynamic firm of designers blends creativity with knowledge in a way that allows us to provide our clients with designs that meet their specific needs. Founded in 1998, Peter has created a firm with experience in a broad range of project types and styles by bringing together a staff of architects and designers with varied architectural backgrounds and skills.

Our firm specializes in several aspects of the residential and commercial design process, including new construction, renovations and restorations. We also offer services in interior design, landscape design, space planning, and site planning.

Our architectural services encompass the entire design and construction process depending on the needs of our clients, from site selection to initial design sketches, models, and 3-D drawings through to construction documents and construction administration and supervision. We also offer specialty services including energy conservation, historic preservation, and assistance with governing Conservation, Historic, and Planning board approval processes.

Our design process is a development of the relationship between architect, client, and site. More than just a "building" or a "place", the goal of our designers is the creation of a space that is informed by all three. Through intense collaboration, we seek to further our understanding of our client's needs and the unique qualities of the site. We then develop a response to these conditions, taking into account both the opportunities and the constraints presented by the project to drive and inform our design. The end result is one that is distinctly specific to client and place.
